CERTIFICATE OF WATER AVAILABILITY

PO Box 700 • Roy WA 98580-0700 • (253) 843-1113 • RoyCityHall@CityofRoyWA.us

Application # 2022-2 (attach copy)

This water system is capable of and will supply water for 79 connections to the project described below and attached. **This Certificate of Availability is void if connection to the water system is not completed within three years.**

Project address: 29401 SR 507 S. Parcel # 0217036009

Owners: Roy Meadows Development Group LLC

Type of project: _____

The proposed development is is not within our approved service area.
This water utility will will not be providing service.

Approved number of system connections "unspecified" Existing source capacity 940 gpm

Number of current/existing users 321 Existing storage 263,200 gallons

Water service will be provided by: direct connection to approved, existing water main
 extension of existing water main(s)

Are water system facilities approved according to DOH requirements? yes

Water service will be made available to this project by (date) as needed

Fire Flow Information:

Location of nearest water main capable of supplying at least 500 gpm In street
in front of project parcel

If not in street at front of property, distance from property to above main is _____ feet.

Fire flow available at 20 psi is 2000 gpm for 120 minutes.

Estimated static pressure at project location is 60 psi.

Distance from center line of property frontage to nearest hydrant measured along routes of fire apparatus is _____ feet.

THE AMOUNT OF AVAILABLE FIRE FLOW INDICATED ABOVE IS IN ADDITION TO REQUIREMENTS FOR NORMAL DOMESTIC MAXIMUM USE.

A contract has has not been signed with the applicant for water service.
The above information is an accurate account of the existing or necessary water system facilities.

Additional comments:

We understand that this document, in absence of a legal contract, constitutes certification of willingness and ability to provide water service. It is further understood that, in the absence of an approved comprehensive plan, additional engineering approval has been obtained which demonstrates that facilities to provide water service to this project are available or can be constructed.
