Roy City Clerk-Treasurer

Unfortunately, I will not be able to attend the Public Hearing about the proposed Oakview subdivision. I own a home in Oakview Heights and I have a concern with the new project.

The potential public safety issue I see is that with these additional homes, there will be approximately 150 homes using a single entry/exit for vehicles getting onto 507. The end of 292nd Street can create a bottle neck for traffic entering or leaving the Oakview and Oakview Heights subdivisions. If there were a fire, for example, traffic could not leave the area safely.

I would think that either a traffic circle or traffic light at the junction of 292nd and 507 could alleviate most of the potential dangers.

Thank you for hearing my concern.
