Good Morning Staci,

Cindy Carlson with the District's Transportation Dept. reached out to me to follow up on this with you. Please see the attached snip of the preliminary plat with the bus stop location highlighted in yellow.

In regards to your question on the location of the bus stop for the adjacent subdivision, it looks like it is 294th St. S & 80th Ave. S. WA 98580.

If you need to look up existing bus stop locations in the future, the District has a button/link at the bottom of each school's web page for Bus Routes and that connects users to the Versatrans site, where you can enter the site address for the student's home and their grade, and it will generate the school info and assigned bus stop location for that address. Some of the newer addresses may not be in the system yet but I have found you can pick one nearby and usually get the info that way.

Please let me know if you have any questions or concerns. Have a great day!

Caitlin McIntyre

I am not sure if you have any information on this development yet. Have you done the usual letters?

Hi Heather,

Thank you for returning my phone call. Please find attached a copy of the proposed plat, Oakview, located in Roy, that I will need to have school bus stop pick-up/drop-off location(s) provided by the school district. There is an existing subdivision next to this one named Oakview Heights. Can someone please tell me the school bus stop pick-up/drop-off location(s) for this one too? Please let me know if you need any additional information to complete this request. I appreciate your assistance in this matter!

Thank you,

Staci Saunders
